

SME Low-Carbon Rewards

As an energy partner to SMEs, we understand that additional support is crucial to achieving low-carbon transformation. That's why we provide a range of sustainability support services to help enterprises reduce energy costs and power up their business operations. Furthermore, we are collaborating with different partners to provide fabulous offers to SMEs participating in energy-saving and carbon-reducing initiatives.

CLP x DBS

You can enjoy fabulous offers by setting up your HKD current or savings deposit account with CLP's bank autopay through DBS, or by successfully applying for the CLP eBill service.

Power Up a Low-Carbon Future with Holistic Energy Management Solutions for SMEs

Business Energy-Saving Tips - Lighting and Air Conditioning Systems

Turn air conditioners on and off **frequently** not only **wastes electricity** but can also **damages equipment**. Powering up an air conditioner consumes more energy, so it is more efficient to **turn the temperature up** when temporarily leaving a room.

Use **high energy efficiency** light bulbs.

Use a dehumidifier rather than an air conditioner to reduce humidity. It is more **energy-efficient** and **cost effective**.

Raise the air conditioning temperature by **two to three degrees** and **run a fan** simultaneously to save more energy.

Energy-Saving Services and Subsidy Schemes

Free energy audit service to help identify energy-saving opportunities and provide solutions to reduce consumption and costs.

Smart Energy Partner's Sharing

Sun Island Education Foundation

Sustainable development is part of the core value of Sun Island Education Foundation. Over the past two years, it has installed LED lighting in the six campuses with the support of the CLP Electrical Equipment Upgrade Scheme. These works have boosted energy efficiency, saved electricity costs, and nurtured a green learning environment where students learn about the importance of conservation and energy preservation.
